DESCRIPTION OF WORK:

MILLING OF EXISTING SURFACE:

Provide a milling machine designed and built for milling existing asphalt roadway pavement with a grade and slope control system. Mill the existing asphalt surface to a uniform surface depth (**shown above**) as required, for the full width of the roadway. Milling should provide a properly cross-sloped surface to maintain drainage throughout construction. Mill the roadway area to provide a finished surface that is free from gouges, grooves, and ridges. Immediately after milling, remove milled material. Carefully remove the existing bituminous material around utility facilities within work areas. Repair or replace utility facilities that are damaged by the milling operation to the satisfaction of the utility owner. Control the rate of milling to avoid tearing of the mat, which causes chunky and non-uniformly milled material. If directed, separate oversized and chunky milled material. Maintain the milled pavement surface free of all loose materials and dust.

General Milling Note: Milling heads mounted to roadway equipment will not be accepted for mainline milling operations. This includes but not limited to milling head mounted onto skid steers, loaders and backhoes. Contractor to retain all millings.

25MM ASPHALT BASE COURSE

Superpave Asphalt Mixture Design, Base Course, PG 64S-22, < 0.3 million ESALs, 25.0 MM Mix. Furnish and place Superpave Asphalt Mixture Design, Base Course, PG 64S-22, < 0.3 million ESALs, 25.0 MM Mix placed at 4" compacted depth across entire cross-section of roadway at location shown above.

9.5MM ASPHALT WEARING COURSE

Superpave Asphalt Mixture Design, 9.5 mm, PG 64S-22, Asphalt Wearing Course < 0.3 ESAL's, SRL-Any. Furnish and place compacted asphalt wearing course material across entire cross-section of roadway at uniform depths as indicated in locations above, using full width paving equipment when possible to avoid joints in the finished pavement. Completed pavement should provide sufficient cross-slope (approximately 2.0%) to maintain positive drainage throughout construction and positive drainage into all existing inlets. Refer to PennDOT Pub 408, section 413.

Tack Note: Contractor must place asphalt tack coat as per Pub 408 Section 460. Contractor to determine application rates based upon existing road conditions as shown in Table B. Contractor must deliver daily tack slips with Bill of Lading and application rate to the municipality. Municipality reserves the right to withhold payment until these items are received. Tack is incidental to paving items.

ATTACHMENT # 1

*Incidental to the above items is cleaning of roadway, milled paving notches, driveway tie-ins, tack coat on existing roadway and vertical faces as needed, longitudinal joints and transverse joints, sealing of joints, sealing of curb, and mobilization and traffic control according to publication 212, 213 and the MUTCD. All work must be completed in accordance with the current PADOT Pub. 408 Specifications and its supplements.

SPECIAL PROVISIONS:

- All work to be completed by August 17, 2024 or liquidated damages will be assessed.
- Sayre Borough reserves the right to reject any and all bids. (Base and/or Alternate Bids)
- Bidder acknowledges that this bid is for a public works contract and bidder is therefore subject to the provisions, duties, obligations and penalties of the Public Works Employment Verification Act, 43 P.S. 167.1-167.11, which is incorporated herein by reference.
- The lowest responsible bidder must comply with the Public Works Employment Verification Act by submitting a Commonwealth Public Works Employment Verification Form to the public body prior to award of contract. The Form and relevant information can be found on the Department of General Services' web site at www.dgs.state.pa.us.
- The above-mentioned verification form is supplied with the contract documents.
- Awarded bidder must notify Sayre Borough 2 weeks prior to anticipated work.
- Prevailing Wages are applicable to this project.
- The contractor will be required to seal the entire length of each curb line and paving joints after paving operations have been completed.
- Sayre Borough will be opening bids on April 17, 2024 and will be awarded at scheduled council meeting on April 24, 2024.

ESCALATOR CLAUSE: IS INCLUDED IN THIS CONTRACT.

Price Adjustment of Asphalt Material – Section 110.04
